

XM Satellite radio is the best service I have subscribed to in my lifetime. I made the choice to pay for my radio in order to avoid the barrage of inane personalities and screeching ads on "free" radio. XM Satellite radio has gone above and beyond superior customer service to deliver the services that its listeners want and WE WANT TRAFFIC AND WEATHER. I live in the 4th largest metropolitan area in the US with horrible traffic, and sometimes horrible weather. XM provides a great service by constantly providing traffic and weather in a way the "free" radio can not. I respectfully urge the FCC to reject NAB's Petition 04-160. Please support choice in America!
